SUMMARY

Highly motivated and detail-oriented Full Stack Developer with a strong foundation in both front-end and back-end technologies. Proficient in HTML, CSS, JavaScript, and modern frameworks like React for front-end development. Experienced with server-side technologies including Node.js, Express, and databases such as MongoDB and SQL. Adept at working in collaborative environments, utilizing Agile methodologies, and committed to continuous learning and improvement. Ready to contribute to a dynamic team and help build innovative web applications.

PROJECTS

Swiggy Clone

React.js

<https://github.com/satvik231/Food-Delivery-project>

This project is a food delivery application developed using ReactJS and integrated with the Swiggy API. It provides users with a seamless experience to browse through a variety of restaurants, select dishes, and place orders for delivery.

Responsive webpages

HTML, CSS, JS

https://github.com/satvik231/prodigy_school_webpage

Developed a highly responsive and user-friendly webpage utilizing HTML, CSS, and JavaScript. Implemented a mobile-first design approach to ensure optimal performance across various devices and screen sizes. Utilized advanced CSS techniques, including Flexbox and Grid layouts, to create a visually appealing and flexible design. Integrated JavaScript for dynamic content updates, interactive elements, and enhanced user experience.

Email Sender

Node.js

<https://github.com/satvik231/Emailer>

Developed a robust email sender application using Node.js and SQL to automate and manage email communications efficiently. Leveraged Node.js for server-side scripting and asynchronous processing, ensuring high performance and scalability. Designed a relational database schema in SQL to store and manage email templates, recipient lists, and logs of sent emails. Implemented RESTful APIs for seamless integration with other applications and services. Integrated Nodemailer for sending emails and ensured secure handling of email credentials and data. Conducted thorough testing and optimization to ensure reliable and efficient email delivery.
